PUNE INSTITUTE OF COMPUTER TECHNOLOGY DHANKAWADI, PUNE – 43.

SCHEDULE OF LAB EXPERIMENTS

Date: 25/06/2025

DEPARTMENT: Computer Engineering

CLASS: T.E

ACADEMIC YEAR: 2025-26

SEMESTER: I

SUBJECT: Database Management System Laboratory

PROBLEM STATEMENT	FOR COMPLETION
	12 July 2025
ER Modeling and Normalization: Decide a case study related to real time application in group of 2-3 students and formulate a problem statement for application to be developed. Propose a Conceptual Design using ER features using tools like ERD plus, ER Win etc. (Identifying entities, relationships between entities, attributes, keys, cardinalities, generalization, specialization etc.) Convert the ER diagram into relational tables and normalize Relational data model. Note: Student groups are required to continue same problem statement in order to design and develop an application as a part Mini Project. Further assignments will be useful for students to develop a backend for system. To design front end interface students should use the different concepts learnt in the other subjects	12 July 2023
also.	18 July 2025
 A. Design and Develop SQLDDL statements which demonstrate the use of SQL objects such as Table, View, Index, Sequence, Synonym, different constraints etc. B. Write at least 10 SQL queries on the suitable database 	,
application using SQL Divil statements.	26 July 2025
Write at least 10 SQL queries for suitable database application using SQL DML statements. Note: Instructor will design the queries which demonstrate the use of concepts which call types of Join Sub-Ouery and View	
Unnamed PL/SOL code block: Use of Control structure and	1 Aug 2025
Exception handling is mandatory. Suggested Problem statement: Consider Tables: 1. Borrower(Roll_no, Name, Date of Issue, Name of Book, Status)	
	GROUP A ER Modeling and Normalization: Decide a case study related to real time application in group of 2-3 students and formulate a problem statement for application to be developed. Propose a Conceptual Design using ER features using tools like ERD plus, ER Win etc. (Identifying entities, relationships between entities, attributes, keys, cardinalities, generalization, specialization etc.) Convert the ER diagram into relational tables and normalize Relational data model. Note: Student groups are required to continue same problem statement in order to design and develop an application as a part Mini Project. Further assignments will be useful for students to develop a backend for system. To design front end interface students should use the different concepts learnt in the other subjects also. SQL Queries: A. Design and Develop SQLDDL statements which demonstrate the use of SQL objects such as Table, View, Index, Sequence, Synonym, different constraints etc. B. Write at least 10 SQL queries on the suitable database application using SQL DML statements. SQL Queries all types of Join, Sub-Query and View: Write at least10 SQL queries for suitable database application using SQL DML statements. Note: Instructor will design the queries which demonstrate the use of concepts like all types of Join, Sub-Query and View Unnamed PL/SQL code block: Use of Control structure and Exception handling is mandatory. Suggested Problem statement: Consider Tables:

	Accept Roll_no and Name of Book from	
	user. Check the number of days (from date of	
	issue).	
	If days are between 15 to 30 then fine amount will be Rs	
	Sper day.	
	• If no. of days>30, per day fine will be Rs 50 per day and	
	for days less than 30, Rs. 5 per day.	
	After submitting the book, status will change from I to R.	
	• If condition of fine is true, then details will be stored into	
	fine table.	
	Also handles the exception by named exception handler	
	or user define exception handler.	
	OR	
	Write a PL/SQL code block to calculate the area of a circle for a value	
	- fine viewing from 5 to 9 Store the radius and the corresponding	
	values of calculated area in an empty table named areas, consisting of	
	the solvene reduce and area	0. 4 2025
	Named PL/SQL Block: PL/SQL Stored Procedure and Stored	8 Aug 2025
5.	Function	
	With a Stand Procedure namely proc Grade for the categorization of	
	to the standard second by students in examination is 1500 and	
	1 000 than student will be placed in distillction category if marks	
	scored are between 989 and 900 category is first class, if marks 899 and	
	225 category is Higher Second Class.	
	Write a PL/SOLblock to use procedure created with above	
	requirement. Stud_Marks(name, total_marks) Result(Roll,Name,	
		22 Aug 2025
	Cursors: (All types: Implicit, Explicit, Cursor FOR Loop,	22 Aug 2023
6.	The stand Cursor)	
	Write a PI /SOI block of code using parameterized Cursor, that will	
	the data available in the newly created table	
	- vi vi il alca ovigilable in the table U Ciliului	
	N_Empld with the data available in the table S_Employer. If the data in the first table already exist in the second table then that data	
		29 Aug 2025
7.	Database Trigger (All Types: Row level and Statement level	2) 1146 2020
	The state of the s	
	Write a database trigger on Library table. The System should keep track	
	of the records that are being updated or deleted. The old value of	
	updated or deleted records should be added in Library Audit table.	05 Sep 2025
8.	Database Connectivity:	00 5 0 p 2 0 20
ð.	NV-its a program to implement MySOL/Oracle database connectivity with any

8.	front end language to implement Database navigation operations (add, delete,	
ð.	front end language to implement Database navigation operations (add, delete, edit etc.)	
9.	front end language to implement Database navigation operations (add, delete,	12 Sep 2025

	operations, SAVE method, logical operators etc.).	
10.	MongoDB Aggregation and Indexing:	19 Sep 2025
	Ge G	1) Sep 2020
	Design and Develop MongoDB Queries using aggregation and indexing with suitable example using MongoDB	
11.		26 Sep 2025
	C T T T T T T T T T T T T T T T T T T T	20 50p 2025
12.	Implement Map reduces operation with suitable example using MongoDB.	03 Oct 2025
12.	Database Connectivity:	05 0012020
	Write a program to implement Mongo DB database connectivity with any front	
	end language to implement Database navigation operations(add, delete, edit etc.)	
	Group C- Mini Projects	
1.		10 Oct 2025
1.	Using the database concepts covered in Group A and Group B,	
	develop an application with following details:	
	1. Follow the same problem statement decided in Assignment -1 of	
	Group A.	
	2. Follow the Software Development Life cycle and other concepts	
	learnt in Software Engineering Course throughout the	
	implementation.	
	3. Develop application considering:	
	a. Front End:	
	Java/Perl/PHP/Python/Ruby/.net/any other	
	language	
	b. Backend: MongoDB/ MySQL/Oracle	
	4. Test and validate application using Manual/Automation testing.	
	5. Student should develop application in group of 2-3 students and	
	submit the Project Report which will consist of documentation	
	related to different phases of Software Development Life Cycle.	
	• Title of the Project, Abstract,	
	Introduction	
	Software Requirement	
	Specification	
	Conceptual Design using ER features, Relational Model in	
	appropriate Normalize form	
	Graphical User Interface,	
	Source code	
	Testing document	
	 Conclusion. 	
	Note: Instructor should maintain progress report of mini project	
	throughout the semester from project group. Practical examination will	
	the an assignments given above in Group A and Group B only	
	Mini Project in this course should facilitate the Project Based Learning among	
	students	
	Question -Answer session with students about all above experiments	At the end of to

Head of Department Dr. B.A. Sonkamble

Subject Coordinator Mrs. P. P. Joshi
